View DealXbox Game Pass Ultimate: was \$15 now \$1 @ Microsoft For one low monthly fee, you get Xbox Live Gold and over 100 high-quality games. For a limited time, discover new favorite games for just \$1 per month for 3 months.View Deal Steam is easily the best platform out there for PC gamers right now and when it comes time for the Steam Sales, everyone cheers. However, Steam doesn't own the market on deeply discounted computer games and you can get even better deals outside of Steam (crazy, I know). AmazonAs surprising as it may be, Steam isn't the only software out there for running your game library. Amazon actually has a pretty killer system hiding on its website that allows you to download again all the games you've ever bought the company as many times as you like. Alternatively, you can copy the purchase key, paste it in Steam, and download the game via Steam as if bought it there—but with the price you get on Amazon.As you play more than a few games, you know the pain of a cluttered steam library—or you... Read moreTime will be forgiven for thinking that Steam has an angle on the cheap video games market, but Amazon actually has some pretty big sales from time to time. Not only does Amazon offer regular daily and weekly deals, but on occasion you can find high-end AAA games for cheaper than Steam, even during the prestigious Steam Sales. In fact, during the most recent Summer Auction, Amazon had Bioshock Infinite—a relatively new AAA title—for less than Steam did during its sale. Steam's annual winter Sale is now, but before you go and empty your wallet, here are some... Read moreHumble Bundles and Indie GalasThe Humble Bundles and Indie Galas are also great sources for amazing sales and steep discount games. While the former tends to stick to dishing out Steam keys, it's possible to activate them on Steam, install them on your computer, and then add them to a service like Desura or just run them with regular shortcuts if you're not a Steam fan. In fact, Humble Bundle even recently added a feature that will activate your keys on Steam for you so you don't have to copy keys and add games manually. Both are working on the pay-what-you-want model. You can get whole packages of games for as little as a dollar, but, if you pay more than average (usually between \$4-10), you can unlock extra games. While it's often geared toward independent developers, you can sometimes find major AAA titles (for example, right now you can get Arkham Asylum and Arkham City plus some other games for less than \$5). Green Man GamingGreen Man Gaming is another hugely popular deal site and for good reason. They often have pretty steep discounts over and above what steam offers. For example, right now you can get 25% off Batman: Arkham Origin brings the price down from \$50 anywhere else to about \$37.50. For a game released just a few weeks ago, it's not too shabby. Good Old Games (Gog.com)While you won't find a ton of modern AAA titles on this site, Gog.com have a ton of older classics that you can't get anywhere else, and usually for pretty cheap. The site also includes user reviews that will often tell you how well it plays on modern systems. If you can't find a copy of that Windows 98 game you loved as a kid, you can probably find it here. Dear Lifehacker, I have some old computer games from the Windows 95 days I want to keep... Reading moreGameFlyFor consoles. GameFly is a bit like Netflix in that it will allow you to rent disks on a subscription basis. However, Pc gamers can also find some pretty steep discounts on downloadable titles. They even activate on Steam. Life couldn't get much more convenient for To Monitor All the Best DealsOf course, that's just the tip of the iceberg. There's no shortage of websites out there that will offer you a deal on a computer game. not. can you keep up with them all? IsThereAnyDeal.com (recommended by a few of you in the comments-thank you!) will track all the different stores and let you know when there is a sale on a game you like. You can enter your Steam wishlist, set price thresholds for notifications, and even filter out any deals that don't activate on Steam. Steam is generally accepted as one of the best platforms out there for finding sweet deals on computer games, and with good reason-steam's sales is one of the best. However, you don't have to wait around for the sky to share to get cheap games all year round. Put some of these other stores in your search (Kotaku's Moneysaver column is a great place to monitor them all), and you'll expand your transaction—find quite a bit (even if eventually importing those games into Steam). Steam).
